

## SPECIFICATION AMENDMENTS

### In the Specification

On page 8, amend the paragraph beginning at line 14 as follows:

Also, by providing a third wall 25, the portion 48 of the insert 47 may be hidden from view by the lip 29 of the wall 25. This is shown most clearly in Figure 4 where it will be noted that the lip portion 29A is in contact with the side wall 24 approximately at the point where it is secured to the distal edge 49 (see Figure 6) of the molded portion 48 of the insert 47. Thus the lip 29 of the wall 25 completely hides the molded portion 48 from view. This is advantageous because it means that the sheen and colour of the molded insert 47 need not match that of the sealing and guiding strip 18.

On pages 8 and 9, amend the paragraph beginning at line 21 on page 8 as follows:

It will be noted that the effect of the smooth radius for the lip 29 24 over the region A (see Figure 5) ; means that the lip 29 24 follows a shorter path than the lips 28 29 and 30 31 which more closely follow the sharp corner 16. The excess length of the lip 29 24 is removed by making a cut at 52, removing the excess length and rejoining the ends. The cut 52 could be made at any point along the arc A.
